

## PROJECT SPOTLIGHT: CIRCLE K RANCH – KAUFMAN, TX

This quarter's project spotlight is Circle K Ranch located outside of Dallas in Kaufman, Texas. The project features several styles of glulam trusses. Chase Patterson with R.M. Rodgers, Inc. worked closely with the contractor to achieve the finished product required by the client. The top photo features the exterior trusses which were painted in the field to match the overall aesthetic.

In order to provide the client with quick and easy installation, the glulam trusses were fully assembled by our experienced fabricators and then shipped via flatbed from our manufacturing facilities in Alabama to Texas. The top right photo depicts the truss assembled on the SWS fabrication floor prior to being wrapped with protective paper.

Once the trusses arrive at the jobsite and are unloaded, they are then erected by experienced professionals using precisely detailed shop drawings prepared specifically for each custom project.

The bottom right photo features an interior view of the building showing tied A-frames, along with decking after installation. The decking was provided by Disdero, who features a number of products complimentary to glulam construction. Both the decking and the trusses have been stained with a semi-transparent tint to highlight the natural warmth and beauty of the wood grain.
